

ZPARK PROPERTY MANAGEMENT INTEGRATION

Product sheet

An add-on service to the Smart Service Base that simplifies operations for property owners and large organizations. By integrating Zpark with your existing property management system (e.g. Vitec or Momentum), all relevant data is automatically synchronised, eliminating double work. The service also supports RFID integration with personnel systems, streamlining access control and user administration.

Reduced costs

Avoid double administration and unnecessary extra costs. Integration with property systems means that data is retrieved and updated automatically.

Increased efficiency

Changes to locations, location owners, and PINs are automatically updated between systems for reduced manual administration.

Better control over operations

The overall solution is streamlined and makes it easier for administrators and customer service who can continue to work in existing system solutions that they are used to.

Pricing - Property Management Integration

Fixed monthly price: 27 SEK per node
Full integration with property systems (e.g. VITEC, Momentum)
Automated IMD mailings via FTP
Automatic update of locations, owners and codes
RFID services and connection to personnel systems (e.g. PEAB ID06)
More efficient processes and less manual work
